Co curricular learning at K12 schools

Co Curricular learning at AES At AES , we have built a learning ecosystem that promotes excellence in Academics and nurtures the social, emotional , physical and moral dimension of an individual's being too. For each dimension we have envisaged a learning segment that deepens the sense of self and the essential tool set to hone the specific skill. Each program is designed to provide the students a choice to explore their interests. The highlight of the co - curricular learning at AES is the way it is seamlessly interwoven with the core Academic.	
Immersion program: At AES our mission is to provide our students with the learning environment that elevates their experience and perspective. To attain this we offer Learning programs that are content rich, globally accepted and broadens the mindset and skill set of our students. Following programs are offered at AES : • Research and writing Program • Leadership and sociopreneurship Program • Creative writing • Western and classical dance and music • Drama and theatre Clubs:	Life Skills program: Developing the moral and spiritual dimension of each child is the cornerstone of the <u>lifeskills</u> program. To develop a connect with the community exploring real life issues, global themes and Sdgs following activities shall be planned Community projects: Connecting with the community through initiatives like: Each one teach one Gratitude day Community meal : UN day Events and Clubs: To infuse the spirit of true Internationalism students will participate in Competitions at Interschool , State and International level around following themes:

Our Academic approach

- **Project Based Learning:** Emphasises project-based learning experiences that allows students to apply theoretical knowledge to practical, real-world situations. This approach encourages critical thinking, problem-solving, and collaboration skills.
- **Personalized Learning Plans:** Tailors education plans to the individual needs, interests, and strengths of each student. This approach recognizes that students may have different learning styles and paces.
- **Collaborative Learning Environment:** Promotes a collaborative learning environment where students work together on projects, solve problems as a team, and engage in group discussions.

About curriculum: What do we deliver through our curriculum?

At K12 , curriculum is developed to guide the teaching and learning in a concise manner keeping it comprehensible, applicable and measurable for all the three stakeholders i.e. Teacher, student and parent. Curriculum is an overarching document for guiding and directing the teachers throughout the year to navigate through learning objectives and outcomes that eventually yield scholastic achievement for the students. Curriculum at K12 is a crosswalk between the popular International frameworks while maintaining the native and board requirements. The unique objective of the curriculum is laid out in the following points.

- To provide an overview of the whole academic year in terms of scholastic achievements.

- To explain the domains and strands culled out for each academic subject
- To provide a clear picture of academic deliverables, approach and its assessment at the end of the year
- To develop the Depth and scope of the yearly goals for the academic year
- To establish the balance between skills and content for a holistic development
- To create the learning benchmarks for entry and exit at each grade level
- To map and measure the Minimum level of learning for further intervention and improvement

Curriculum we offer at K12 schools:

Indian Curriculum (National institute of open schooling)

K12 Schools offers an Indian curriculum to children aged 14+ through NIOS wherein a student is enrolled as a private candidate. NIOS is an “Open School” to cater to the needs of a heterogeneous group of learners up to pre-degree level. At the Secondary and Senior Secondary levels, NIOS provides flexibility in the choice of subjects/courses, pace of learning, and transfer of credits from CBSE, some Board of School Education and State Open Schools to enable learner’s continuation.

Cambridge curriculum (CAIE: Cambridge Assessment International Education)

CAIE is a part of the Cambridge University Press & Assessment – an organisation that provides world-leading academic research, learning and assessment globally, backed by the first-class teaching and research departments of the University of Cambridge. The curriculum is flexible, challenging and inspiring, culturally sensitive yet international in approach. Cambridge students develop an informed curiosity and a lasting passion for learning. Cambridge qualifications are globally recognized and acceptable by every UK university, by more than 850 universities in the US (including all the Ivy League universities). At K12 schools, we offer Cambridge curriculum in Primary, Middle and Senior school respectively.

How will we deliver through the curriculum?

The second most important role of curriculum is to provide insights into the transaction of the content. This is critically important in managing the equilibrium in the curricular and cocurricular activities that are defined as the Immersion program in the context of K12 Schools. In order to deliver a well curated curriculum an equally effective pedagogical approach is required for attaining the desired outcome. Some of the distinctive features of curriculum delivery are as follows:

- Inquiry based approach encourages active learning through a well-developed lesson plan that prompts thinking skills , brainstorming, group work and agency amongst the learners.
- Project based learning promotes skill and rigour for a more authentic learning
- Developmental approach towards the assessment of learning is encouraged through Success criterion for learning outcomes and self-assessment rubrics

What will we achieve through our curriculum?

The sole objective is to develop a fine balance of content and character through our curriculum so that each student emulates the core values and traits that ensure preparedness for college and career. The end endeavour of education at k12 schools will be to develop a strong moral fabric and self esteem amongst the students. The following Portrait of an k12 schools student demonstrates the values imbibed by them.

Portrait of K12 student : Empathetic
 Reflective
 Knowledgeable
 Risk- taker
 Balanced
 Communicator

Skill and competency framework

Our framework scaffolds the broad based curriculum at local and global level to demonstrate skills and competences that can be fostered to make learning outcomes attainable and scalable. The framework also promotes a balanced conceptual and topical approach for rigour and depth of understanding. It is characterised by a balanced skill and content approach that allows students to understand the skills they are acquiring while also grasping the essential information and concepts. For teachers the framework provides a roadmap of expected learning outcomes at a particular grade level spread across the academic year and guidance to transact the skills and content in the rightful manner making each student aware of the same. The curriculum is marked by its “process over product” approach hence the emphasis on skills in the framework.

At K12 schools, learning is structured in a framework that allows the fluid exchange of knowledge, understanding and skill building. The skill and competency framework guides the course of learning taking account of following significant elements:

- Learning strands
- Skills

- Learning outcomes
- Success criterion

Alignment of the framework:

Skill and competency framework is the annual curriculum developed for all grade levels and for core subjects. The vertical and horizontal alignment of the learning goals to meet the cognitive and chronological needs of the students and the progression of concepts is well established. The benchmark document to mark the minimum level of learning at each grade level supports academic improvement for raising the bar in terms of key skill areas like Reading and writing. It also helps identify learning gaps during transitions of grades consequently throttling conversations around differentiation and reinforcement programs for academic support.

The framework is further divided into following documents to establish the spiral of Knowledge, concepts and skills:

Scheme of work: The Annual distribution of learning goals and mapped progression of concepts horizontally through each grade year and vertically at the progression of the concepts in the same grade level is planned in the scheme of work of each subject.

Monthly syllabus: This is a part of the micro planning to ensure delivery of the course content in a measurable manner. This is provided to parents every month and used by teachers for further planning.

Lesson planners: This document aids the transaction of learning through the defined learning objectives using the pedagogical elements of inquiry-based learning.

Learning structure and approach at each learning cohort

FOUNDATION SCHOOL	PRE-NURSERY - UKG
PRIMARY SCHOOL	GRADE 1 - GRADE 5
MIDDLE SCHOOL	GRADE 6 - GRADE 8
SENIOR SCHOOL	GRADE 9 - GRADE 12

Early years Curriculum

5 Years

Education in early childhood is of utter importance as it sets the foundation for the learning journey of the child. Our curriculum is well balanced and integrated to meet the native and international needs to foster the essential sense of inquiry and rigour needed to meet the learning needs in foundation years and bolster if throughout the Primary year.

Language & Literacy

- Reading
- Writing
- Vocabulary
- Speaking & listening
- Numeracy
- **Number sense**
- Data Handling
- Number operations
- Shapes & Measurement

Grade 1 - 5	Grade 6 - 8	IGCSE	AS/A Level
English	English	English: FLE/ESL	English
Science	Science	Math's: Extended/ International	Physics

Cambridge Primary Curriculum

6 to 11 years

The Primary Curriculum is aimed at children aged 6-11. It encourages children to be creative and innovative, building their independent thinking skills and allowing them to develop a love of learning. The primary curriculum is designed to provide learners with a solid foundation, which they can build upon as they progress through further education.

The knowledge, content and skills in Primary are structured to explicitly focus on developing creativity, expression and wellbeing. The Cambridge Primary Curriculum is a flexible programme which can be easily adapted to the needs of the school. The curriculum is designed in such a way that it eliminates the process of rote learning and enables you to apply the concepts in the real world.

Core Subjects	Skills Developed	Strands
English	Confident and fluent communication. Proficient readers and able to engage with a range of texts. Excellent orators and ability to express in their creative work.	Reading Writing Speaking Listening
Maths	Ability to develop critical thinking. Application of Math in everyday life. Develop necessary computational skills.	Number Geometry and Measure Statistics and Probability
Science	Develop a life-long curiosity about the natural world. Enables students to seek scientific explanations to the phenomena around them. Able to apply concepts in their practical life.	Biology – living things and how they interact. Chemistry – the study of matter. Physics – the interaction of matter and energy. Earth and Space – planet Earth, the wider Solar System and beyond.

Second Language (French, Hindi, , German and Arabic)	Confident and fluent communication Proficient readers and able to engage with a range of texts. Excellent orators and ability to express in their creative work.	Reading Writing Speaking listening
Global perspective	Ability to develop critical thinking. Enhance collaborative learning and Peer learning.	Ability to evaluate, reflect, analyse, research, collaborate and communicate.
ICT	Introduce learners to the key ICT applications they need to use in order to acquire that literacy, and to understand the impact of technology on our daily lives. Guidance on the e-Safety and ethical implications of the technology used.	E- Learning E- sources Digital Literacy

Cambridge Lower Secondary Curriculum

11 to 14 years

Cambridge Lower Secondary is typically for learners aged 11 to 14 years. It helps you prepare students for the next step of their education, providing a clear path as they progress through the Cambridge Pathway in an age-appropriate way.

Core Subjects	Skills Developed	Strands
English	Confident and fluent communication. Proficient readers and able to engage with a range of texts.	Reading Writing Speaking Listening

	Excellent orators and ability to express in their creative work.	
Maths	Ability to develop critical thinking. Application of Math in everyday life. Develop necessary computational skills.	Number Geometry and Measure Statistics and Probability
Science	Develop a life-long curiosity about the natural world. Enables students to seek scientific explanations to the phenomena around them. Able to apply concepts in their practical life.	Biology – living things and how they interact. Chemistry – the study of matter. Physics – the interaction of matter and energy. Earth and Space – planet Earth, the wider Solar System and beyond.
Second Language (French, Hindi, , German and Arabic)	Confident and fluent communication Proficient readers and able to engage with a range of texts. Excellent orators and ability to express in their creative work.	Reading Writing Speaking listening
Global perspective	Ability to develop critical thinking. Enhance collaborative learning and Peer learning.	Ability to evaluate, reflect, analyse, research, collaborate and communicate.

ICT	Introduce learners to the key ICT applications they need to use in order to acquire that literacy, and to understand the impact of technology on our daily lives. Guidance on the e-Safety and ethical implications of the technology used.	E- Learning E- sources Digital Literacy

Foundation School:

Foundation school caters to children aged 3 to 6 years. We at K12 understand that the psychological needs of the children in this age are of utter importance to establish a good schooling experience. Our Foundation Programme is based on developing all dimensions of development (Physical, social, emotional, cognitive & Language) fundamental in a child's growth to build a happy and engaging online learning environment.

Based on the guidance from NEP Foundation school curriculum is based on Inquiry and Experiential Learning. Inspired by world-class pedagogies we have developed a curriculum that allows exploration with the environment and also builds essential literacy and numeracy skills. Learning through Play is at the core of our Teaching Approach.

Some of the highlights of our Foundation Programme are:

- Play
- Exploration
- Social -emotional Learning
- Investigation
- Well-structured Phonic Program

Conglom Classes: Foundation School (Nursery, lkg, Ukg)

- Nature Walk
- Story time
- Phonic Drill/Spell Bee
- Mindfulness
- Show and tell/Festival/Event
- Celebration

Age	Strands	substrands
3 years to 5 years old students	Communication, language and literacy	Reading Writing Speaking listening
	Numeracy	Numbers Patterns Data Handling
	Creative expression	Drawing Dance Music Movement Drama
	Personal, social, emotional dev	Interaction Expression Imagination Experience
	Physical development	Motor skills Fine Motor skills
	Understanding the world	Knowledge Awareness Research

Primary school: The Primary school is composed of Grades 1-5 with children aged 7-10 years. This is a stage where maximum acquisition of learning happens. To tap the energy and readiness of children to learn new skills and knowledge we have planned our methodology around an application-based learning approach. Students will be involved in investigations and experiments over passive learning to enhance interest and engagement.

Highlights of Primary School are increased emphasis on literacy skills through:

- Reading Program
- Spelling program
- Creative writing Program

Following subjects are being offered:

- English (First Language)
- Second Language - Compulsory
- Third Language - Optional (from grades 3-5) French/German/Arabic

- Mathematics
- Computer
- World Vision
- Social Studies / Science
- Arts
- ICT

Conglom Classes: Skill building is essential for students to be future ready and develop predispositions to be reflective and empathetic learners with effective social skills, Morning assemblies at K12 are designed towards skill building in different dimensions of learning that transcend beyond cognitive skills.

Primary School (Grade I, II, III, IV and V)

- Socio Emotional Learning
- General Awareness
- Journal writing/Spell Bee
- Mindfulness
- Global Celebration/Festival and Events

Enrichment activities

- Yoga
- · Music
- · Dance
- · Aerobics
- · Personality Development Classes

Middle school: The middle school comprises Grades 6th, 7th & 8th and would have learners aged 11-14 years. We at K12 are aware of this transitional phase in a child's life hence we have tried to build programs that best meet their social and psychological needs. As per the proposed recommendations by NEP we have infused the content with Inquiry-based learning so that students' curiosity and thinking skills are piqued. Special emphasis is laid on building a love for reading by exposing them to good titles by national & internationally acclaimed authors.

Following subjects are being offered:

- English (First Language)
- Second Language -Hindi
- Third Language (French/Arabic /German)
- Mathematics
- Social Studies (History, Civics and Geography)
- Science (Physics, Chemistry and Biology)

- Arts
- ICT
- Coding

Conglom Classes: Middle School (Grade VI, VII and VIII)

- · General Awareness/Current Affairs
- · Mindfulness
- · Global Themes
- · Public speaking/Creative Writing
- · Global Celebration/Festival and Events

Enrichment Activities

- · Yoga
- · Music
- · Dance
- · Aerobics
- · Personality Development Classes

● **Secondary School**

K12 Schools offers an Indian curriculum to children aged 14+ through NIOS wherein a student is enrolled as a private candidate. NIOS is an “Open School” to cater to the needs of a heterogeneous group of learners up to pre-degree level. At the Secondary and Senior Secondary levels, NIOS provides flexibility in the choice of subjects/courses, pace of learning, and transfer of credits from CBSE, some Board of School Education and State Open Schools to enable learner’s continuation.

At K12 Schools learners enrol as private students with NIOS to get certification and grades generated directly by NIOS. Complete support is provided by the academic team of K12 to make the academic journey a success for the learners.

Subject choice (NIOS)

(Max 5 Subjects)

Grade 9 and 10	Grade 11 and 12
English (Mandatory)	English

Science (Mandatory)	Physics
Hindi	Chemistry
Social Science	Biology
Maths	Psychology
Data Entry operations	Accounts
Psychology	Economics
Business Studies	Business Studies
Economics	Sociology
	Computer science
	Mathematics
	Political science
	Geography

SOP FOR NIOS

Once the child is enrolled with us for academic support, a formal registration is also required to be done with NIOS.(with the help of K12 schools)

Two Sessions/Blocks:

Block 1- Admission starts from 16 th March 2024 -15 th September 2024- can appear for first exam in April – May next year

Block 2- Admission starts from 16 th September 2024- 15 th March 2024- Can appear for first exam in Oct/Nov next year.

Details of the Cambridge curriculum being offered at K12 schools

Description of the curriculum (Cambridge)

- **Project Based Learning:** Emphasises project-based learning experiences that allow students to apply theoretical knowledge to practical, real-world situations. This approach encourages critical thinking, problem-solving, and collaboration skills.
- **Personalized Learning Plans:** Tailors education plans to the individual needs, interests, and strengths of each student. This approach recognizes that students may have different learning styles and paces.
- **Collaborative Learning Environment:** Promotes a collaborative learning environment where students work together on projects, solve problems as a team, and engage in group discussions.

Supplementary learning for academic rigour

In the virtual classroom, maintaining rigour and engagement is essential to ensure that learning happens in an accelerated manner. To achieve this purpose online tools with proven credibility are integrated into the curriculum. Century is one such tool used over and above the standardised instruction in the classroom. Century Tech plays a key role in enriching the educational experience for our students and empowering them to achieve their full potential

About Century Tech

The introduction of Century Tech software for students in grades 1 to 10 following the British curriculum. This innovative platform offers a comprehensive suite of resources, assignments, and tools designed to enhance teaching and learning experiences.

Century Tech provides:

- 1) **Engaging Resources:** Access to a wide range of interactive learning materials tailored to each student's individual needs and learning style.
- 2) **Interactive Assignments:** Opportunities for students to complete assignments, quizzes, and assessments online, allowing for immediate feedback and progress tracking.
- 3) **Personalised Learning:** Adaptive technology that analyses students' strengths and areas for improvement, providing personalised recommendations and support.
- 4) **Teacher Support:** Tools and resources for educators to create customised lesson plans, monitor student progress, and provide targeted intervention where needed.

Instructional program

As opposed to the traditional model of Physical schools, creating engagement in online schooling is crucial for keeping students motivated, fostering a sense of community, and enhancing learning outcomes. Here are key features for fostering engagement in online schooling:

- Interactive Content
- Discussion Forums
- Collaborative Projects
- Peer-to-Peer Interaction

Instructional time : As per the research and inputs based on experience , instructional time at k12 is carefully designed as per the learning requirements, attention span and appropriate digital consumption for a particular age group. Instructional time is a blend of both scholastic and co scholastic classes.

The specified instructional hours as recommended by Cambridge in the scheme of work for a particular grade and subject is usually between 130 to 140 hours. The time schedules for each grade are planned accordingly. The total length of instructional time for each cohort is mentioned as below:

Cohort	Grades	Instructional time
Foundation school	Nursery,kg,ukg	2.5 hrs
Primary school	I,II,III,IV and V	4.5 hrs
Middle school	VI,VII,VIII	5 hrs
Senior school	IX,X,XI and XII	6 hrs

Learning batches: Keeping the demography of the learners in center , K12 schools offer two learning batches; morning and afternoon to its students. The structure of instruction and academic processes remain the same for both the batches. Mentioned below is the demographic details of k12 students:

Country	COUNT of Country
Afghanistan	4
Bahrain	9
Canada	1
China	3
Egypt	1
Germany	1

India	299
Iran	1
Iraq	1
Ireland	3
Israel	1
Jordan	2
Kuwait	8
Malaysia	1
Morocco	1
Myanmar	1
Nigeria	2
Oman	16
Pakistan	7
Palestine	1
Poland	1
Portugal	1
Qatar	34
Saudi Arabia	63
Singapore	2
Sri Lanka	2
Sudan	1
Switzerland	1
Tanzania	2
Turkey	17
United Arab Emirates	148
Grand Total	635

Transaction of Instruction as per the Diversity, equity and inclusion policy of the school:

Our parents ,students and teachers form the K12 schools community. The cultural and native context of students and parents is at the heart of all decision making processes.The school calendar and celebrations accommodate the diverse needs of the community. Teachers are periodically trained to adapt to the Internationalism of the school by following the best practices and strategies to deliver the instruction effectively. The choice of text and selection of anecdotes shared during the lessons are neutral in nature to promote appreciation and tolerance for all cultures. Building International mindedness using diverse content is the cornerstone of learning at K12 schools.

Assessment framework

Our approach towards Assessment is guided by research and cemented by adherence to International curriculum standards. Holistic assessment encompasses development of not only knowledge and skills but also the socio emotional aspect for manifestation of values and attitudes that influence learning and scholastic achievement long term.

Structure of Assessment: Assessment is aimed at providing helpful feedback for growth and improvement thus the way assessments are designed is critically important. For an assessment that poses a positive influence on academic performance and motivation of students, the breadth and depth of content, conceptual understanding and positive mindset of the student towards assessment has to be embedded in the process of assessment.

Following assessments are planned as per our standard and practices:

- Baseline assessment
- Formative assessment
- Summative assessment

Methods of assessment: Employing the student centric approach for assessment helps create a conducive learning environment. Conducting assessments in a non threatening manner lessens intimidation and enhances motivation. To build in the growth mindset as suggested by Carol Dweck, following tools and strategies are used for holistic assessment that takes into account skills and attitudes as well:

- rubrics
- anecdotal records
- checklists
- open-ended Tasks
- self created rubrics

Monitoring of learning aims to check the progress of learning against personal learning goals and success criteria. It occurs daily through a variety of strategies: observation, questioning, reflection, discussing learning with peers and teachers, and well-considered feedback to feed forward for next steps in learning. Tools used for monitoring include open-ended tasks, written or oral assessment, and a learning portfolio.

Each term will include both formative and summative assessment and will be carefully planned keeping in centre the developmental appropriateness and learning needs and expectations.

Reporting on learning informs the learning community the progress and achievement of the students' learning, identifies areas for growth and contributes to the efficacy of the programme. The following ways are being used by schools for the purpose of Measuring & Reporting.

- Parent/teacher/student conferences

- **Reports:** An online Report Card is shared with the parents twice in a year. Along with the achieved grades, the teachers also write detailed subject remarks notifying student's strengths, weaknesses and their recommendations in each subject.
- **Learning progressions:** In addition to the Report Card, parents are notified of student achievement and progress during formal parent teacher meetings (PTM) four times in a year.
- The school believes in regular and efficient communication channels between the school and parents. Therefore the parents are encouraged to communicate with the child's subject teachers asking for feedback and the teachers are encouraged to provide feedback of the child to the parents. Apart from the four PTMs, the parents are also encouraged to meet the teachers or programme coordinator to discuss the child's performance, if needed.

Assessment Plan

Setting high expectations from the students is the key principle towards enhanced academic performance. All parameters of learning are well attained when students are prompted towards higher order thinking and engaged in tasks that impel research and stretching oneself beyond one's comfort zone.

EXAMINATION **PATTERN**

Note: The criteria of passing marks will be minimum **33%**

Assessment in K-12 schools is a vital component of the teaching and learning process, serving multiple purposes to support student growth and achievement. Here's an overview of assessment practices commonly used in K12 schools:

1) Formative Assessment: These assessments are conducted during instruction to monitor student learning and provide ongoing feedback. Formative assessments can take various forms, including quizzes, exit tickets, class discussions, and observations. They help teachers identify student strengths and areas for improvement, adjust instruction accordingly, and guide instructional planning.

2) Summative Assessment: Summative assessments are administered at the end of a unit, semester, or school year to evaluate student learning and achievement. Examples include end-of-unit tests, final exams, projects, and portfolios. Summative assessments provide a comprehensive measure of student performance and help determine students' readiness to progress to the next level or course.

3) Rubrics and Feedback: Rubrics are scoring guides used to evaluate student performance based on predefined criteria. Providing constructive feedback based on rubric criteria helps students understand their strengths and areas for improvement, supporting their continuous growth and development.

Overall, effective assessment practices in K-12 schools should be aligned with learning objectives, provide meaningful feedback to students, inform instructional decisions, and promote student engagement and motivation. By employing a variety of assessment strategies, educators can gain a comprehensive understanding of student learning and support each student's academic success.

How do we approach Differentiation?

In K-12 online schooling, differentiation is a critical aspect of ensuring that each student's unique learning needs are met. Here are some strategies for implementing differentiation in the online classroom.

1) Baseline Assessment

A baseline assessment at K12 is an initial evaluation or measurement taken at the beginning of a learning process to establish a starting point from which progress can be measured over time. In the context of K-12 education, baseline assessments are used to gauge students' current knowledge, skills, and abilities in specific subject areas or academic standards. These assessments help teachers identify individual student strengths and areas for growth, inform instructional planning, and track students' academic progress throughout the school year.

After a baseline assessment, k12 schools identify specific students who may benefit from additional support in certain subjects. Through a combination of standardised tests, diagnostics, and personal interviews, we pinpoint the areas where extra attention is needed.

To address these needs, we have introduced Saturday remedial classes on alternate weekends. These classes will provide focused instruction to help students strengthen their understanding and skills in identified subjects.

Remedial Classes

Remedial classes play a vital role in supporting students who may need additional assistance in certain subjects. We take remedial classes to ensure the success of every student.

CLASS	TIME	SUBJECT	HRT
LKG & UKG	2:00 pm - 2:30 pm	English	Meenakshi
GRADE 1	03.00 PM - 03.25 PM	FRENCH	Gurpreet Kaur
	1:00 - 1:40	Maths	Nikki
GRADE 2	03.00 PM - 03.25 PM	FRENCH	Gurpreet Kaur
	2.30 - 2.55	Computer	Sneha
	3:30 pm - 4:00 pm	English	Ritu
GRADE 3	3.00-3.25	Computer	Sneha
	1:30 -2:00	german	Palak
	01:40 - 2:20	English	Ritu
GRADE 4	2:00-2:30	Maths	Kiran
	1:30-2:00	Science	Rupa

Cambridge Upper Secondary Curriculum

In the IGCSE curriculum across grades 9 and 10, students will complete approximately 60% of the course content in grade 9, with the remaining 40% covered in grade 10. This adjustment has been made to ensure a more balanced and manageable workload for our students, allowing them ample time to thoroughly engage with and master the material. By front-loading a significant portion of the curriculum in grade 9, we aim to provide students with a strong foundation that will support their continued academic success in grade 10 and beyond.

14 to 16 years

Cambridge Upper Secondary builds on the foundations of Cambridge Lower Secondary.

It is one of the world's most popular curriculum and internationally accepted for 14 to 16 years old. It has more subjects to choose from thereby giving a platform to students to equip themselves with skills. Students get an opportunity to demonstrate their learning, particularly when their first language is not English. Cambridge curriculum is a student friendly curriculum which enables the student to choose from many subjects and also a choice between core and extended curricula, making Cambridge IGCSE suitable for a wide range of abilities.

Cambridge International AS & A Levels

16 to 19 Years

Cambridge Advanced is typically for learners aged 16 to 19 years who need advanced study to prepare for university and higher education. Cambridge Advanced builds on the foundations of Cambridge Upper Secondary. It will help learners to develop independent study skills which universities value highly. It develops a deep understanding of subjects

and independent thinking. It has a worldwide recognition and thousands of students apply at leading universities every year with Cambridge International AS & A Levels.

Subject Choices

IGCSE Level	AS Level and A Level
English: FLE/ESL(0500/0510)	English (8021)
Maths: Extended/ International(0580/ 0607)	Physics (9702)
Physics (0625)	Chemistry (9701)
Chemistry (0620)	Biology (9700)
Biology (0610)	Accounts (9706)
Accounts (0452)	Economics (9708)
Economics (0455)	Business Studies (9609)
Business Studies (0450)	Sociology (9699)
Sociology (0495)	Computer Science/IT (9618/ 9626)
EVM (0680)	Maths (9706)
Computer Science/ ICT (0478/0417)	
French/ German/ Arabic (0520/0525/0544)	

Exam series in IGCSE and Advanced levels

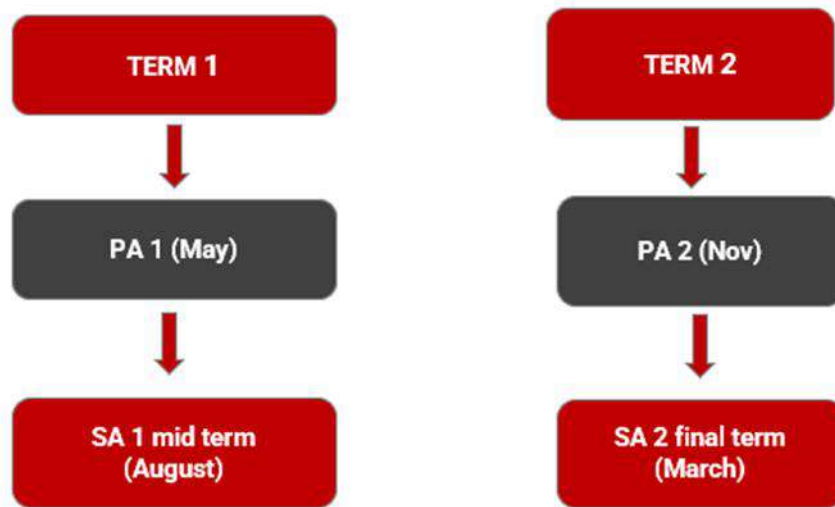

Exam Series: There are 3 exam series for IGCSE & AS/A Levels: -

- Feb-March series
- May-June
- October-November

- Feb-March series is offered only in India Since we are an online school, we cannot conduct physical board exams.
- Board exams the students will have to register in a nearby IGCSE centre or IGCSE school as a private candidate.
- There will be registration fees which parents will have to pay to the school where they are getting registered. K12 school has no connection with that registration fee.
- K12 informs when the registrations are open for the respective series. Parents are requested to decide in advance which series the child is targeting.
- Parents/students can consult the teachers once before registering as they will be able to help you with the subject codes and also which series the child will be better prepared for.
- Some subjects are available based on the number of students per class. In case if a student wants to give any other subject over and above in the list, they have to prepare themselves and an undertaking will be taken from the parent.
- Students will be appearing as a private candidate from a school in and around your place of residence or in another city. K12 will assist you in providing you the list of IGCSE schools which offer their school as a centre for private candidates. K12 will not be responsible for any kind of enrollment or the registration fees charged by the school.
- Cambridge board charges examination fees for every subject (only in grade 10) which has to be borne by the parent and has to be paid to the examination centre.
- K12 prepares students for the board examination with adequate practice and mock exams.
- We don't offer a linear model in Grade 10th IGCSE, if a student takes admission with us, they will have to finish grade 9th and 10th with us.

Assessment

EXAMINATION PATTERN

Note: The criteria of passing marks will be minimum **33%**

Assessment in K-12 schools is a vital component of the teaching and learning process, serving multiple purposes to support student growth and achievement. Here's an overview of assessment practices commonly used in K12 schools:

1) Formative Assessment: These assessments are conducted during instruction to monitor student learning and provide ongoing feedback. Formative assessments can take various forms, including quizzes, exit tickets, class discussions, and observations. They help teachers identify student strengths and areas for improvement, adjust instruction accordingly, and guide instructional planning.

2) Summative Assessment: Summative assessments are administered at the end of a unit, semester, or school year to evaluate student learning and achievement. Examples include end-of-unit tests, final exams, projects, and portfolios. Summative assessments provide a comprehensive measure of student performance and help determine students' readiness to progress to the next level or course.

3) Rubrics and Feedback: Rubrics are scoring guides used to evaluate student performance based on predefined criteria. Providing constructive feedback based on rubric criteria helps students understand their strengths and areas for improvement, supporting their continuous growth and development.

Overall, effective assessment practices in K-12 schools should be aligned with learning objectives, provide meaningful feedback to students, inform instructional decisions, and promote student engagement and motivation. By employing a variety of assessment strategies, educators can gain a comprehensive understanding of student learning and support each student's academic success.

Attaching the Sample of k12 Report card.

Student's Name -

Grade -

Performance Grade

MARKS RANGE	MARKS RANGE
46 - 50	A1
41 - 45	A2
36 - 40	B1
31 - 35	B2
26 - 30	C1
21 - 25	C2
16 - 20	D
15 and below	E (Needs Improvement)

Achievement Levels

A+	Wow	I do more than what is expected from me
A	Good Job	I do what is expected of me
B+	Great Effort	I do most of what is expected from me
B	Try a little harder next time	I don't do much of what is expected from me
C	You need to try	I don't even try

Effort Levels

R	Rarely
O	Occasionally
C	Consistently
