

Academic Manual 2025-26

K12 Schools is an online school offering education to students from Pre-K to 12 from different demographics making it a truly international school with a diverse school community of parents, students and teachers from different walks of life. The online school makes good quality learning accessible for all, transcending the physical boundaries and making best resources in terms of faculty and staff available for creating a world class teaching learning experience for the K12 school community.

A well-structured Learning management system is the key factor in determining the efficacy of instruction in an online school. At K12 school, the synchronous classes happen in two batches catering to different curricula and time zones to meet the varied needs of the global audience. The endeavour is to disseminate the best education through effective use of technology for students to continue their studies in an uninterrupted manner. While there are challenges very different from the physical school, the advantages are no less, our school policies and procedures are developed with special focus on the needs and requirements specific to online school with respect to the following broad areas:

- Our Ideology and approach
- Our pedagogical viewpoint
- Curriculum design
- Instructional design

Cornerstone of learning at K12 Schools

The K12 School community is guided by the principle of Inclusion and diversity which also implies that ‘all voices matter’. The EVPL management team ‘lead by example’ for educational leadership to emulate the values of mutual respect and trust which percolates further to the faculty and parent community.

The policies and processes for the above-mentioned areas emerge from the collaborative discussions around the vision and mission statements and fair deliberations around our ideology and approach towards making the school processes oriented towards the attainment of our academic deliverables which are as mentioned below;

- Guided by research, driven by internationalism and inspired by native roots, K12 Schools strives to infuse the teachings of world-renowned educators and philosophers like Ken Robinson, JD Krishnamurthy, John Dewey in its educational construct.
- To nurture intellectual curiosity and instil a **strong sense of being and belonging** amongst the learners.
- To create an environment that allows exploration of self, nature and life around in pursuit of happiness and knowledge -
- To develop a seeking spirit that sharpens the intellect, fair judgement and inspire innovations for larger good.
- To promote a **secular conduct and encourage global outlook** that transcends beyond the narrowing beliefs.
- To blend the best **online practices to make learning accessible** for students from across the globe.
- To foster international **mindfulness** amongst our learners through availability of best resources and reading materials that **broaden their perspective and build tolerance and respect, an essential competency of a 21st century learner.**

Our Pedagogical View Point

- At K12 the process of learning is intended to impact all **dimensions** of a child's being: Aesthetic, moral, physical, social, emotional and cognitive. A balanced approach at all three **critical stages of growth** i.e. childhood, teenage and adulthood needs to be employed to meet the specific needs and to make the learning process a positive experience. The unique mode of **online teaching and learning** brings with it unprecedented challenges and opportunities of growth and discovery hence the need to build all other quintessential of teaching and learning environment central to the online teaching approach. What we teach and How we teach is and should continue to be driven by the norm of collaboration, agency and

voice and choice of all key stakeholders of the K12 school community. Following are the building blocks of our approach:

- The trajectory of the teaching and learning process is well thought out in terms of its adoption and application.
- The way the children learn is significant for teachers to understand in order to cull out an experience that stirs the mind, impacts the intellect and touches the soul; for learning only makes sense when it is meaningful and relatable
- Based on the end goal of grooming young adults who are **inquisitive, innovative and social entrepreneurs** we have opted for the teaching learning methodology that is **not just a short term approach to direct instruction but an immersive approach that intrigues the learners, fosters engagement and allows constructive improvement .**
- **Research based theories and approaches** to Instruction are used to attain the desired outcome in terms of **higher order thinking, conceptual understanding, retention and improved academic performance.**
- **Collaborative approach** towards understanding the essential elements of curriculum planning, its implementation and review significantly improves the quality of delivery in the **virtual platform**
- **Engagement** is the key to effective teaching and learning in the online mode as the “**barrier of the screen**” can only be overcome when contextual and emotional bond is established between the teachers and students through effective engagement.
- **Learning is disseminated through digital tools** that pique interest , promote research skills and support curricular and cocurricular skills along with learner profiles and core competencies.

Curriculum design

About Curriculum: What do we deliver through our curriculum

Curriculum is developed to guide the teaching and learning in a concise manner keeping it comprehensible, applicable and measurable for all the three stakeholders i.e. Teacher, student and parent. Curriculum is an overarching document for guiding and directing the teachers throughout the year to navigate through learning objectives and outcomes that eventually yield scholastic achievement for the students. In the online structure the unique objective of the curriculum is laid out in the following points.

- To provide an overview of the whole academic year in terms of scholastic achievements.
- To explain the domains and strands culled out for each academic subject
- To provide a clear picture of academic deliverables , approach and its assessment at the end of the year
- To develop the Depth and scope of the yearly goals for the academic year
- To establish the balance between skills and content for a holistic development
- To create the learning benchmarks for entry and exit at each grade level
- To map and measure the Minimum level of learning for further intervention and improvement.

The Curriculum encompasses every experience the student is exposed to and offers a challenging stimulation enabling the students to achieve their fullest social, intellectual, spiritual, emotional, cultural and physical potential. The curriculum is in alignment with core values based on the fundamental principle of respect for all promoting 21st century skills of collaboration, creativity and critical thinking.

Curriculum at k12 schools aims to offer an educational program that is:

Broad

Introducing each student to a wide range of dispositions, experience, knowledge through extensive subject choices to ensure academic success at school and college level.

Balanced

Ensuring that sufficient emphasis and time is allowed for each aspect of the programme to be effective.

Relevant

Ensuring that material, teaching style and content is relevant and contributes to an overall, sound education, preparing students for the opportunities and responsibilities of a rapidly changing world.

Differentiated

Appreciating that all students have varying learning styles, we aim to ensure that the teaching style is matched to individual students, aiding in the development of their abilities and aptitudes.

Continuous

Provide progression and continuity in teaching learning so that children benefit from. Progression in their learning. Constant evaluation of learning outcomes to map the curriculum as per the student needs based on data driven responses to instructional programs considering both students and teachers.

Effective

Creates a conducive environment for online learning and effective use of digital tools for sustained engagement leaving no scope for deficit of social skills rather a provision of large learning landscape with peers from global community hence the development of **International mindedness** and **perspective**.

Curriculum We Offer at K12 school

INDIAN CURRICULUM: The **CBSE** Curriculum is a popular board amongst Indian parents. It is well mapped with NCERT as per NEP Guidelines, integrated with the partner schools from Global Consortium to meet the local expectations and international standards. As per the NEP recommendations the emphasis on thinking skills, active learning and project-based approach with the inclusion of new Digital learning have found their valid space in the school curriculum. The social emotional well-being is central to the life skills program wherein students work with the community to identify real world problems and

propose solutions. The CBSE curriculum is implemented through American methodology as followed by the partner American schools.

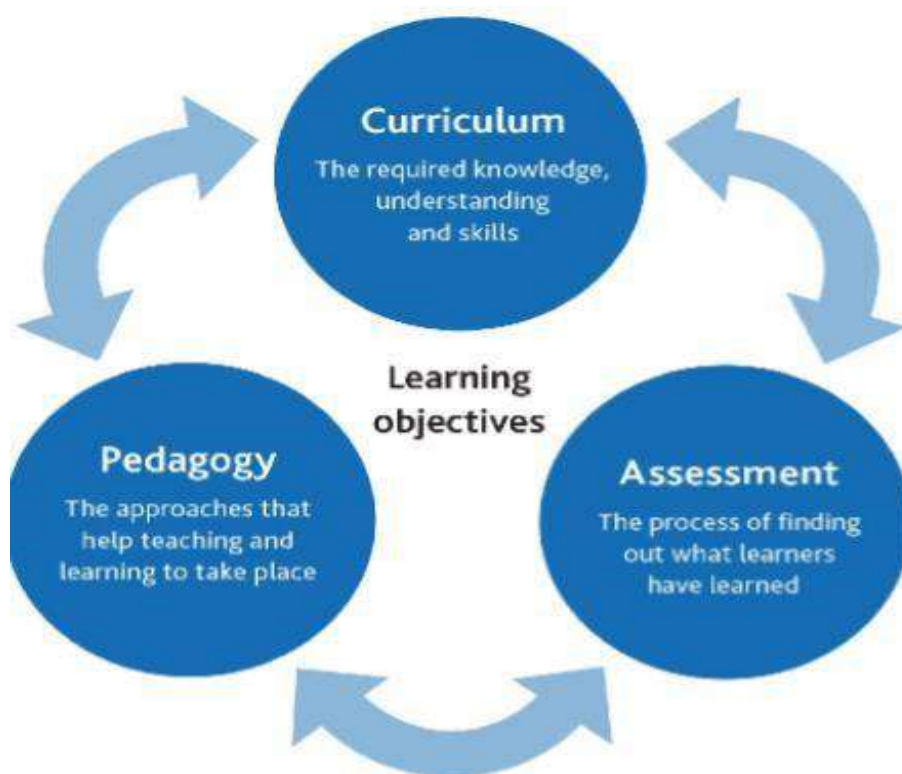

Cambridge Curriculum: CAIE is a part of the Cambridge University Press & Assessment – an organisation that provides world-leading academic research, learning and assessment globally, backed by the first-class teaching and research departments of the University of Cambridge.

The curriculum is flexible, challenging and inspiring, culturally sensitive yet international in approach. Cambridge students develop an informed curiosity and a lasting passion for learning. Cambridge qualifications are globally recognized and acceptable by every UK university, by more than 850 universities in the US (including all the Ivy League universities).

At K12, we offer Cambridge curriculum in Primary, Middle and Senior school respectively

Five elements lie at the heart of a Cambridge education:

- international curriculum
- teaching and learning
- assessment
- international recognition
- global community

**Cambridge
Pathway**

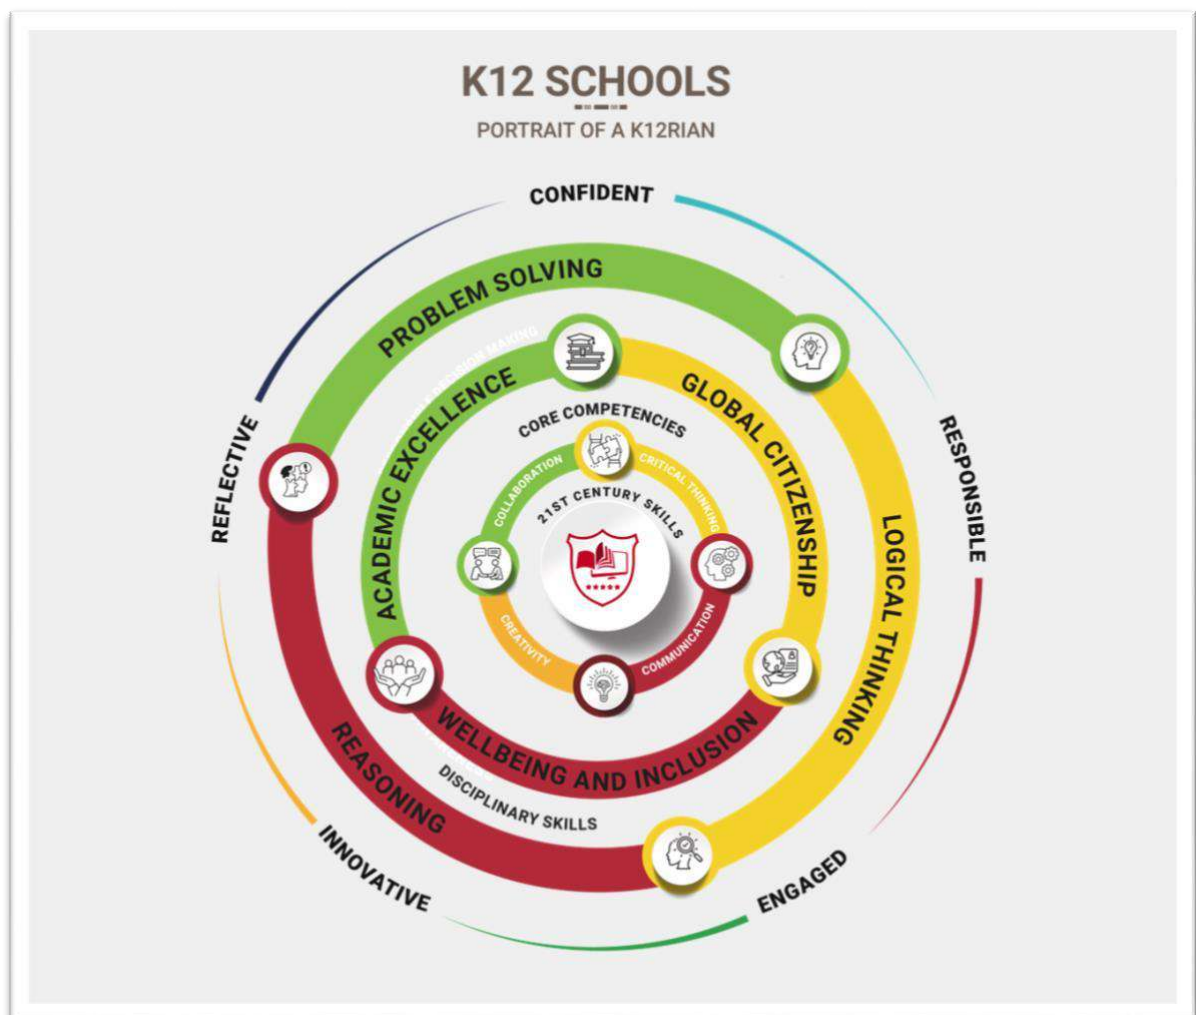

A clear path for educational success from age 5 to 19

Cambridge Primary 5 to 11 years old*	Cambridge Lower Secondary 11 to 14 years old*	Cambridge Upper Secondary 14 to 16 years old*	Cambridge Advanced 16 to 19 years old*
A broad and balanced curriculum: • 10 subjects (including English, Mathematics and Science) • Classroom and external assessments	A broad and balanced curriculum: • 10 subjects (including English, Mathematics and Science) • Classroom and external assessments	A wide choice of subjects at: • Cambridge IGCSE™ (70+ subjects) • Cambridge O Level (40+ subjects) Cambridge ICE Certificate	A wide choice of subjects at: • Cambridge International AS & A Level (55+ subjects) • Cambridge Pre-U (20+ subjects) Cambridge AICE Diploma Cambridge IPQ

What will we achieve through our curriculum?

The sole objective is to develop a fine balance of content and character through our curriculum so that each student emulates the **core values** and traits that ensure **college and career readiness**. The end endeavour of education at K12 school will be to develop a **strong moral fabric** and **self-esteem** amongst the students. The following profile demonstrates the traits imbibed by K12rians.

Portrait of an k12 student is defined through following learner profiles that each and every student is expected to develop through an iterative purpose. All stakeholders: governing team, teachers, students, parents work cognizantly towards emulating them. These are also well aligned with the Cambridge framework followed by the school:

Learner profiles	Attributes
Confident	Confident in working with information and ideas – their own and those of others
Reflective	Reflective as learners, developing their ability to learn
Responsible	Responsible for themselves, responsive to and respectful of others
Innovative	Innovative and equipped for new and future challenges
Engaged	Engaged intellectually and socially, ready to make a difference

Core competencies: Considering the global design and Online structure of K12 schools, we strive to groom our students to be global citizens through core competencies as defined below. In order to make these competencies measurable and observable for governing body and teaching faculty some well-defined objectives are added to capture the trajectory of growth and implementation of these competencies in school's academic processes and best practices. School policies to emulate and nurture these core competencies are developed collaboratively by school faculty.

Goal 1: Academic Excellence

- Objective 1.1: Increase student achievement across all grade levels and subject areas.
- Objective 1.2: Implement a differentiated instruction approach to meet the diverse learning needs of students.

Goal 2: Global Citizenship

- Objective 2.1: Promote cultural awareness and understanding through curriculum integration and diverse learning experiences.
- Objective 2.2: Foster a sense of social responsibility and community engagement among students.

Goal 3: Well-being and Inclusion

- Objective 3.1: Enhance student well-being through comprehensive social-emotional learning programs.
- Objective 3.2: Create an inclusive and supportive environment that celebrates diversity and respects individual differences.

Academic policies and procedures:

EVPL management team members take the responsibility of reviewing and tracking the attainment of student learning outcomes, learner profiles and core competencies. The educational leadership team composed of Head of school and coordinators from the academic team collectively

develops policies that support the implementation of the expected outcomes. All members of the school community are apprised and updated about the school policies for both curricular and co-curricular segments consistently through different academic events. Some of the key principles that form the springboard of our policies and processes revolve around are:

- Well-being - for all students and teachers
- Use of digital technology: An effective LMS for online learning and AI guidance
- Diversity and inclusion: Democratic approach towards admission and academic processes
- Assessment: A fair and data driven practice to track student progress.

Reporting

Educational leadership consistently reports the following to EVPL management team about the following areas:

- Student learning outcomes
- Academic progress
- Performance review of staff
- Professional development
- Parent engagement

Reporting on	Process or methods employed
Student learning outcomes	Feedback and surveys
Academic progress	Result analysis report

Staff: Monitoring and evaluation	Observation reports
Professional development program	PD calendar
Parent engagement	Academic events

How Will We Deliver the Curriculum?

The most important role of curriculum is to provide insights into the transaction of the content. This is critically important in managing the equilibrium in the curricular and cocurricular activities that are defined as the Immersion program. In order to deliver a well curated curriculum an equally effective pedagogical approach is required for attaining the desired outcome. Some of the distinctive features of curriculum delivery are as follows:

- Inquiry based approach encourages active learning through a well-developed lesson plan that prompts thinking skills, brainstorming, group work and agency amongst the learners.
- Project based learning promotes skill and rigor for a more authentic learning
- Active learning approach where learning is not only about the content, but is also about the process. Active learning develops students' autonomy and their ability to learn.

Skill and Competency Framework

Our framework scaffolds the broad-based curriculum at local and global level to demonstrate skills and competences that can be fostered to make learning outcomes attainable and scalable. The framework also promotes a balanced conceptual and topical approach for rigor and depth of understanding. It is characterized by a balanced skill and content approach that allows students to understand the skills they are acquiring while also grasping the essential

information and concepts. For teachers the framework provides a roadmap of expected learning outcomes at a particular grade level spread across the academic year and guidance to transact the skills and content in the rightful manner making each student aware of the same. The curriculum is marked by its “process over product” approach hence the emphasis on skills in the framework.

Learning is structured in a framework that allows the fluid exchange of knowledge, understanding and skill building. The skill and competency framework guides the course of learning taking account of following significant elements:

- Learning strands
- Skills
- Learning outcomes • Success criterion

All these elements in our learning framework have been categorically placed to ensure that the necessary dimensions of acquisition, assimilation and application of knowledge finds its place in planning, delivery and assessment of learning. These have been developed keeping in mind the level of learning expected as a crosswalk between the Cambridge curriculum and Indian boards of education.

Skills: The 21st century skills as proposed by OECD or P21 Framework have been our inspiration to investigate the skills that will find the rightful place in our curriculum. Skills and competencies are the important entities in the planning, delivery and assessment of the curriculum as they impact the cognition of the students at a deeper level and all significant aspects of learning. Skills and competences make learning tangible for students and teachers thus making them measurable.

The skills framework consists of following disciplinary and life and career skills

- Problem solving
- Reasoning
- Logical thinking
- Creativity
- Prediction

- Synthesizing
- Collaboration
- Compare and contrast

The skill and competency framework encompasses all the above-mentioned essential elements for delivering a successful academic program at all grade levels. The native content is mapped within the framework to meet the requirements of the CBSE board and the Cambridge board opted by the school.

Alignment of the framework

Skill and competency framework is the annual curriculum developed for all grade levels and for core subjects. The vertical and horizontal alignment of the learning goals to meet the cognitive and chronological needs of the students and the progression of concepts is well established. The benchmark document to mark the minimum level of learning at each grade level supports academic improvement for raising the bar in terms of key skill areas like Reading and writing. It also helps identify learning gaps during transitions of grades consequently throttling conversations around differentiation and reinforcement programs for academic support.

The framework is further divided into following documents to establish the spiral of Knowledge, concepts and skills:

Scheme of work: The Annual distribution of learning goals and mapped progression of concepts horizontally through each grade year and vertically at the progression of the concepts in the same grade level is planned in the scheme of work of each subject.

Benchmark document: The minimum level of learning for concept acquisition at each grade level is clearly laid out to establish the entry and exit level at each grade for smoother transition and mapping the learning outcomes for further improvement in the academic front.

Monthly syllabus: This is a part of the micro planning to ensure delivery of the course content in a measurable manner. This is provided to parents every month and used by teachers for further planning.

Curriculum at K12: The curriculum at is in accordance with the two National and International Boards i.e. CBSE and CAIE. The skill and competency framework is the Master document that helms the academic curriculum using the essential elements that ensure the depth of the content, quality of delivery and cohesiveness of the curriculum.

At each school level curriculum is defined and structured based on the age and requirement of the students. Details of the same can be found in the Instructional design manual of the school for reference by the faculty and staff.

Reviewing and reporting;

EVPL management team after the report from the educational leadership reviews the essential curriculum documents and policies periodically for its implementation and efficacy and guides the leadership team accordingly.

EVPL management team closely evaluates the insights, suggestions and recommendations from educational leadership to curriculum design.

Instructional design

School ensures that students are provided with high quality learning experiences that lead to a consistently high level of achievement by creating an effective and well- managed learning environment in which the individual needs of each child are met. Teaching is centred on the learning process of the individual child, with the learning of basic skills as one of the school ‘s most important goals. In developing the school's curriculum therefore, professional staff members individualize programs and to integrate the teaching and reinforcing of basic skills in all subject areas. The instructional design at K12 schools is disseminated through three learning cohorts as mentioned below along with their brief description:

Foundation school

Education in early childhood is of utter importance as it sets the foundation for the learning journey of the child. Our curriculum is well balanced and integrated to meet the native and international needs to foster the essential sense of inquiry

and rigour needed to meet the learning needs in foundation years and bolster it throughout the Primary year.

Approaches to learning: In early years we amalgamated the popular approaches like Reggio Emilia, Waldorf and experiential learning to develop the learning experience that is centred around “ Play” and “Inquiry” for a more tangible and relevant experience. There is enough brain research to support theories of experiential learning proposed by David Kolb and John Dewey.

Based on these theories the curriculum of Foundation school promotes exploration, observation and application through structured and unstructured activities that allow tactile stimulation and interaction with the natural environment to build connections between concepts and understanding of those concepts. Some of the significant areas for planning the engagement are:

- Exploration of Natural environment
- Play
- Imagination and creativity
- Functional literacy

Primary school and Middle School: Primary school comprises Grades 1 to 5 and Middle school comprises grade 6 to 8.. The Framework emphasizes on inquiry which underpins four key areas

- Inquiry approach
- Conceptual understanding
- Real - world learning

This is a stage where maximum acquisition of learning happens. To tap the energy and readiness of children to learn new skills and knowledge we have planned our methodology around an application-based learning approach. Students will be involved in investigations and experiments over passive learning to enhance interest and engagement. The subject specific learning outcomes are available in the schemes of work as per the CAIE guidelines.

Senior school: Senior school comprises Grades 9 to 12 categorized as IGCSE in Grades 9 and 10 and Advance levels in Grades 11 and 12 as per CAIE. K12

students are offered a wide range of subjects to choose from as listed in the Instructional Design Manual of the school. Students appear as Private candidates for their exams.

TEACHING & LEARNING ENVIRONMENT

K12 Schools ensure that students are provided with high quality learning experiences that lead to a consistently high level of achievement by creating an effective and well- managed learning environment in which the individual needs of each child are met. Based on the approach of Growth mindset as proposed by Carol Dweck the triad of learning between students, teachers and parents is nurtured around building resilience, adaptiveness and flexibility amongst learners to stay intrinsically motivated over the instant gratification or extrinsic motivation through grades. Mindset is the key element that needs to be developed for students to be lifelong learners. Teachers also need training in imparting the instruction with open mindedness in order to accept learnings from educational researches and pedagogical innovations to constantly challenge deep rooted conventions of traditional teaching model. Approaches to learning that promote deep thinking and set high expectations from students are employed to create learning environments at K12 schools. The table below validates the interplay between the learning environment , teachers and skills that define the instructional program at K12 schools.

Learning Students learn best when they: • are happy • are interested and motivated • achieve success and gain approval • are given tasks which match their ability • clearly understand the task • are confident, feel secure and are aware of boundaries • are challenged and stimulated	Organization Teachers organize the environment to ensure that students have the opportunity to: • work individually, in groups and as a class • make decisions • work co-operatively • solve problems • be creative • discuss their ideas • develop social skills • develop independence
---	---

are aware of what they need to do to improve	- use initiative - receive support - achieve academically
--	---

Environment Learning takes place in an environment which: - is challenging and stimulating - is peaceful and calm - is happy and caring - is organized - is well resourced - makes learning accessible - is encouraging and appreciative - is welcoming - provides equal opportunities - provides a working atmosphere	Skills Children are encouraged to develop organizational skills and independence through: - appropriate tasks - confidence building - example - co-operation - provision of suitable opportunities - responsibilities
---	--

Instructional design at K12 Schools is based on the core principles as mentioned below:

- **Personalized learning:** Every student has a different learning style and developing learning experience in conjugation with it enhances academic outcome, motivation and ownership of learning
- **Differentiated approach:** Differentiating the instruction, outcome and style as per the learner's needs require data about student profile and employed in creating differentiated lesson plans specific to student needs.
- **Multi-disciplinary approach:** Instruction has to be in context to what students' study vertically and horizontally across the subjects for them to make meaning of what they are learning and why are they learning and where can it be applied in real world context.
- **Collaborative approach:** For both students and teachers to make most from the learning, collaborating for knowledge sharing is essential. In the case of students, working collaboratively provides students essential skills to communicate, make consensus and exchange knowledge.
- **Holistic learning:** Curricular and cocurricular learning operate parallel in terms of their significance in impacting an overall development of student's personality and mindset. Events and clubs ; podcasts with Industry experts ; enrichment activities like yoga, dance , art and design are integral part of the instructional design
- **Social emotional learning:** Development of the self and awareness of the world around us is the building block of International mindedness nurturing self-assured students aware of their goals and intentions. EL is embedded in the instructional design of k12 schools.

Implementation of the Instructional design

A keen understanding of the content knowledge, learning objectives and pedagogy for creating a learning engagement for the students is essential for effective implementation of the curriculum.

- The lesson plan templates at K12 schools are designed in accordance with the pedagogy to elicit thinking skills and promote active learning.
- Schemes of work are referred to for developing annual planners and monthly planners and lesson plans
- Cambridge portals is referred to be updated about the changes in curriculum and coursework
- Content is also published on the lms to be made available for students and parents for further revision
- Lesson plans are collaboratively designed at the cohort level during grade level meetings with inputs and insights from fellow peers.
- Lesson plans also record the differentiated needs of the students
- Differentiated needs spectrum is defined as: Proficient , exemplary and needs improvement for clear reference of all faculty
- Differentiated requirements are met through remedials with specific students during Saturdays as a mandatory requirement.
- Assessment rubrics with a four-scale parameter are well defined for standardized reference for all.
- Academic profiles of students based on Baseline assessments are available for teaching cohort to track academic improvement.
- Parent profiles are available for their increased involvement as subject experts, guest speakers.

Responsibilities:

- Edovventures Management are responsible for ensuring a clear Teaching & Learning policy is in place in school
- Educational leadership is responsible for the implementation of the Teaching & Learning policy and ensuring that staff deliver the programme in such a way that the needs of all students have been met.
- School staff is responsible for ensuring the policy and procedures are followed in school, and for ensuring that they provide a variety of opportunities for students to maximize their achievements in and out of the classroom. They play a fundamental role in ensuring

that every student experiences a personalised programme that meets their individual needs.

CURRICULUM DEVELOPMENT

- All members of the teaching staff will be involved; everyone's contribution is valued.
- Curriculum development is led by the Vice Principal/ Principal.
- The Group Leaders / Departments are responsible for the curriculum and its development in their respective Year Group / Department.
- The Group Leaders / Department have a full set of the school curriculum documents for reference.
- It is the responsibility of all teachers to stay up to date with curriculum developments that may help School be more effective.

CURRICULUM PLANNING

- Each lesson should be carefully planned to match the learning objectives for that subject area and the relevant scheme of work.
- Lesson plan formats to be used for parity in instruction.
- Each lesson should be carefully prepared so that all the required materials and resources are to hand before the lesson begins.
- All lesson ppts to be available on LMS and used effectively during the lesson.
- Recordings of lessons to be used during reflections with peers as part of the sharing best practices under the professional development program
- If a gap in resources is identified when preparing work the Head Section / Department should be informed.
- Teachers should seek the support and guidance of their Head Section / Department if they are uncertain about any aspect of a lesson.
- All curriculum plans must be completed in advance and copies made available to the Head of Section and Vice Principal/ Principal no later than the first day of each term.
- Course completion is strictly adhered to specifically during term exams.

RESPONSIBILITIES:

- Teachers are responsible for the standards of teaching and learning in their lessons and must be able to demonstrate student progress in terms of student learning outcomes.

- Group Leaders are responsible for all planning, student progress and the level of achievement for the children in their Year.
- Heads of Department/ Subject are responsible for the standards of their subject throughout School and should monitor and evaluate student progress and be ready to report this to the Senior Leadership Team.
- The Assessment Coordinator reviews student progress data and term planning.
- Led by the Leadership Team, all teachers are expected to play an active part in the scrutiny of work to ensure standards are maintained and improved.

CURRICULUM INFORMATION EVENINGS/ Open House/ coffee mornings

Throughout the year departments are encouraged to offer parents an information evening on a particular topic or general review of ongoing work. These might focus on sharing the K12 approach to an aspect of learning or introduce new ideas and methods. At k12 we aim to involve parents in the process of education with strong home/school partnerships.

INFORMATION EVENINGS/ ORIENTATIONS

At the beginning of Term each Year Leader hosts an information evening for the parents of the children in the Year Group.

Specialist teams send representatives to describe the work of their departments.

The evenings include a tour of the classrooms and an opportunity to informally meet the teachers.

HOMEWORK POLICY

School assign relevant, challenging and meaningful homework assignments that reinforce classroom learning objectives, for all students. It provides them with the opportunity to apply information they have learned, complete unfinished class tasks, to work with their parents and develop independence.

In the online set up of our school, homework should involve use of digital tools and also submitted in a digital format depending upon the age. Students should be made aware of using google docs to work collaboratively over group assignments , create PPTs for research work.

Homework should be uploaded on the LMS for visibility of parents as well, corrected homework should be available for parents to track child's regularity in submissions.

Homework contributes toward building responsibility, self-discipline and lifelong learning habits, master skills and reinforces learning.

Homework is assigned with increasing complexity and time requirement as the student progresses through school.

School activities, cultural interests, family obligations, and personal interests can be equally educational, and school take these into account when balancing the demands made on students.

Homework is not used as a form of punishment.

Responsibilities

- Edovventures Management is responsible for ensuring a clear Homework policy is in place.
- Principal is responsible for the implementation of the Homework policy and for using the guidelines provided to ensure that every member of the school community is aware of the expectations that exist and that homework is used as a positive reinforcement for learning.
- School staff is responsible for ensuring the policy and procedures are followed in school.

Home work may be given as:

1. **Practice Exercises:** These help students to remember and practice newly acquired skills - such as memorizing mathematical tables, practicing spelling words, writing essays and reading for pleasure.
2. **Preparatory Homework:** This requires students to search for and read and research background information to prepare them for future lessons on a specific subject using a flipped classroom model where they explain their understanding about the topic.
3. **Extension Assignments:** These encourage students to pursue knowledge individually and imaginatively. Assignments may include writing a book review, researching local news.

Listed below are the responsibilities of teachers, students and parents with regard to homework. **Teachers will:**

- assign homework that is meaningful and useful to individuals
- provide appropriate and timely response to all homework assignments
- provide a balance between long- range and short- term assignments
- give assignments over weekends which are no longer than a daily assignment
- monitor long- term assignments in order to avoid last minute student efforts
- give clear, concise directions; allow time for student questions; consider availability of materials; provide legible worksheets when used
- inform parents of their role in supervising homework
- ensure that students who are absent know how they may make-up homework
- monitor the effectiveness of homework as reflected in student performance • ensure that homework is a relevant extension of work assigned in class.
- ensure that all homework is corrected.

STUDENTS WILL:

- record the directions for homework
- ask questions when necessary to clarify the assignment
- follow a schedule and keep materials in order
- hand in, on time, neat, accurate, and meaningful products
- plan time for completion of long- term assignments
- determine and complete homework assigned during absence

PARENTS WILL:

- provide a suitable place for study
- help students develop routine home study habits
- ensure that absence does not interfere with makeup
- assist and correct but not do the actual work and notify the teacher if students experienced extreme difficulty

- assist students in making wise course and course level choices
- be aware of long- term assignments and assist students in learning to budget their time accordingly .

HOMework (GRADES KG - 1)

Homework in these grades should focus on literacy skills and mathematics concepts and vocabulary. There should be parental involvement and low dependence on paper and pencil activities. In addition, a read aloud program should be in place in kindergarten augmented with independent reading of Graded Readers as appropriate. Mathematics homework assignments should deal with how mathematics can be found in the lives of students and parents, basic counting and sorting skills, and mathematics vocabulary. In first grade, a read aloud program should be encouraged all year long. Students should be required to participate in an independent reading program as they develop reading fluency. Mathematics homework assignments will be aligned to the Grade 1 standards including memorizing addition and subtraction facts. By the end of first grade, students should have transitioned into a homework program that requires regular completion and return of homework assignments.

(GRADES 2-3)

Homework in Grades 2-3 should be assigned Monday- Friday. Homework assignments should be according to grade level standards in core content areas with a focus on reading and mathematics including memorization of multiplication and division of facts and number bonds.

(GRADES 4-5)

Homework in reading and mathematics and other content areas should be assigned on a regular basis .The homework should be meaningful and consistent with grade level content standards including maintenance of basic arithmetic facts. Homework assigned over weekends should only be used for projects or independent reading.

(GRADES 6-8)

Homework at this level should be regularly assigned in core curriculum areas, not necessarily daily. Whenever possible, guided practice should be provided for students prior to independent practice being assigned to students as homework. Weekend or holiday assignments should be

largely for projects or makeup work. It is the student's responsibility to complete homework assignments including requesting assignments due to absence.

(GRADES 9-12)

Regular homework should be assigned and expected for most high school courses. The total daily hours required to complete assignments will vary according to the courses the student has chosen to take. Length of the assignments will vary according to purpose and academic level, but it is suggested that moderate assignments completed and well done are more effective than lengthy or difficult ones which are poorly done.

- A structure is provided so that teachers can plan cooperatively in assigning long term projects or major activities in order to ensure an equitable load of results for the student.
- It is the student's responsibility to complete homework assignments including requesting assignments due to absence. Students are also responsible to meet with their teacher(s) when they have difficulty completing an assignment or need additional help in understanding the assignment. It is the student's responsibility to study and review all subjects whether a formal assignment has been given or not.
- Students who have not met the Grade level standards may be required to complete additional homework assignments beyond the stated guidelines.
- It is expected that teachers will communicate with parents in a timely manner when homework is not completed regularly.
- Students should receive feedback on homework assignments in a timely manner using a variety of correction methods.
- A homework plan must also address techniques that will be taught to help students allocate their time wisely, meet their deadlines, and develop good personal study habits.
- In assigning major projects and activities that represent a significant portion of a student's grade and/or time, teachers will:
 - Establish and communicate criteria for the evaluation of the project including identifying minimum requirements, format and presentation guidelines and characteristics of levels of performance (grading levels).
 - Establish clear due dates for final project completion to assure student progress toward project completion.

Teachers are expected to communicate with parents if students fail to meet major check points.

- Work on major project assignments should be included in the time allotted for homework.
- The school shall specify the means by which parents shall be informed regarding homework expectations, the relationship of homework to the student's grades, how to best help their child with homework, and school resources to assist their child with homework.
- Students who miss school work because of an excused absence shall be given the opportunity to complete all assignments and tests that can be reasonably provided. As determined by the teacher, the assignments and tests shall be reasonably equivalent to, but not necessarily identical to, the assignments and tests missed during the absence.
- Teachers shall assign such makeup work as necessary to ensure academic progress, not as a punitive measure.
- In high school, homework should develop in students' habits of reviewing work undertaken in class.
- It is expected that homework will be set on a regular basis in each subject.
- Coordination across faculties is essential to accommodate competing demands in regard to homework, assessment tasks, assignments and examination preparation. This is particularly important in the senior years of high school.
- There are times when students should be provided with the opportunity to negotiate the amount, type and time frames of homework.
- Homework diaries are used to develop students' organizational skills and time management, and to improve home-school communication.
- As students move into the senior school it is expected that homework demands will increase. The time required of individuals to complete assignments varies. The homework activities must, therefore, be planned to meet each student's individual learning profile. Though it is impossible to predict the time necessary for all

students to complete assignments because of different learning rates and age levels, the following is suggested:

GRADE	HOMEWORK	No. Of Subjects
9 to 12	30 minutes + 30 minutes+ 30 minutes+ 30 minutes Independent Study	3
6 to 8	30 minutes + 30 minutes +30 minutes Independent Study	2
3 to 5	20 minutes + 20 minutes +30 minutes Independent Study	2
1 & 2	20 minutes + 20 minutes+ 20 minutes independent Study	2
KG 2	20 minutes reinforcement + 20 minutes Reading	
KG 1	Weekend reinforcement assignments	

When Homework is assigned the teacher has to indicate the approximate time required for its completion.

Grade 3 – Grade 12: Reinforcement Worksheets in Mathematics must be sent home every weekend. These will include the concepts learnt in the previous weeks/ months. The emphasis will be on the number of concepts revised than the quantum of work and should not take the students 20 -30 minutes (depending on their Grade Level) to accomplish the same.

Projects assigned for Home Work should be creative, age appropriate and relevant to instruction in the classroom. Project work should be purposeful – not busywork and must engage the students more than the parents

LEARNING ENVIRONMENT POLICY

The surroundings in which children learn greatly influence their academic performance and well-being in school. K12 schools provide a safe, stimulating online environment appropriate to the age of the students, which encourages and supports learning. The instructional design of the school keeps in center the necessary pros and cons of studying online and using digital platforms as a

mode of learning hence the instructional hours are designed as per the cognitive requirement and age appropriateness of specific cohort.

A transition time of ten minutes between classes is provided for providing necessary break from the screen.

Co curricular activities are placed in the time table so that the monotony doesn't set in and necessary physical activity is provided for students to stay alert.

Teaching learning resources used both in terms of visual impact and production, are appropriate to the age range of the students to whom they apply.

Sessions on safe use of digital technology are done periodically for students to ensure well being of the students.

Cultural diversity of school is acknowledged across all school processes in terms of creating a school calendar that accommodates important festivals and international days, Celebrating local and global days of significance, integrating reading literature and academic learning that fosters cultural diversity.

Whole school staff observes a secular conduct and use of democratic language.

Policies are developed to safeguard student's health , smooth instructional facilitation and ethical use of technology. Some of the policies addressing healthy online environment in K12 school are as follows:

- Child protection policy
- Wellbeing policy
- Digital use policy
- Anti plagiarism policy
- Data safety policy
- AI use policy
- Inclusion policy

Responsibilities

- Edovuventures Management team is responsible for ensuring a clear Learning Environment policy is in place in schools
- Principal along with educational leadership team are responsible for the implementation of the Learning Environment policy and for ensuring there is a safe, secure, clean & stimulating environment throughout the school

- School staff are responsible for ensuring the policy and procedures are followed in school in establishing a stimulating, challenging and celebratory environment for the children they teach.

ASSESSING, MARKING & REPORTING POLICY

K12 school ensures that the progress of every student is regularly monitored and benchmarked against the individual, others of similar age and ability within the school and across the network.

The policy identifies that the strengths and weaknesses of each student is, to inform planning for the future and to enable the school to communicate accurate information about the student to the student him/herself, other teachers, parents and, where required, other schools.

Responsibilities

- Edovventures Management are responsible for ensuring a clear assessment, reporting and marking policy is in place in K12 schools
- Educational leadership team is responsible for the implementation of the Assessment, reporting and marking policy and for using the guidelines provided to draw up clear procedures for ensuring the progress of all students is monitored, recorded and communicated to appropriate stakeholders.
- School staff are responsible for ensuring the policy and procedures are followed in school.

Assessment is the process by which pupils and teachers gain insight into learning. Assessment has the following functions:

- to focus on what a student can or cannot do (diagnostic/baseline);
- to decide what a student needs to do next (formative);
- to sum up a student progress so far, in order to inform parents and teachers (summative);
- to provide information on performance of the school to the wider community (evaluative).

Although students prepare for tests and examinations, the curriculum in school is not driven by such tests.

Recording involves selecting and retaining what is significant in learning, and reporting involves informing others about the learning. Giving students informative and helpful feedback and enabling parents to know how their child is progressing through the school's Management Information System is part of the school values. Assessment policy is developed with inputs from all staff members and constantly reviewed for improvement and upgradation in terms of integrating new tools of assessments in the online platform.

SUBJECT ENRICHMENT ACTIVITIES • Term1--- Minimum 2 in May, July, August, September ,Oct, • Term 2— Minimum 2 in October, November, December, January	05	1. Maths- Math lab, Lab file, Mental Math, PBL 2. English/ Hindi/ Languages—ASL-Listening & Speaking skills, Reading Project (Supplementary Reader), Elocution/ JAM 3. Science— Practical, Inquiry-based projects, PBL, Experimentation, Science Lab file etc. 4. Social Science-- Disaster management project, All this could be aligned with CBSE'S guidelines for project work
---	----	--

ASSESSMENT FRAMEWORK for teachers

PORTFOLIO	05	1. Best notebook work, Assessments 2. Projects/PBL data 3. Self-assessments/ Reflections 4. Peer assessments 5. Classwork, Assignments, Journals 6. Artwork (2 per term) 7. Mind maps / Graphic Organizers/ Flow charts 8. Appreciation work –Olympiad/ Any sports Certificates, exemplary work 9. Narrations, Journals, Map work 10. Participation of the student in different activities 11. Online participation through screen shots of apps/tools used—eg nearpod, padlet, mentimeter, peardeck, quizz, jamboard, ppt etc.
-----------	----	---

K12 POINT OF REFERENCE:

Aims:

- to enable pupils to be successful in tests and examinations within a broad, balanced and enriched curriculum;
- to enable pupils to assess their own learning and set themselves challenging targets;

- to measure progress by using value-added assessments;
- to ensure that there is a comprehensive and coherent system of formative assessment in place including personal, social and emotional development;
- to provide pupils with meaningful and helpful marking and feedback;
- to enable parents to access their child's assessments;
- to provide parents with regular and meaningful reports;
- to enable parents to access their child's assessments and reports via the school's Learning Management System.

TYPES OF ASSESSMENT

Assessment may be:

- norm-referenced-performance is measured against the performance of other pupils;
- criterion referenced-performance is related to one or more specific attainment targets;
- value-added - performance is measured against pupils with the same or similar starting point.

Good assessment practice:

- is based upon clear learning intentions;
- plays an integral part in classroom activities;
- is appropriate to the task;
- focuses on learning processes as well as learning outcomes;
- draws upon a wide range of evidence;
- places achievement in context;
- indicates strengths and identifies weaknesses;
- involves pupils in reflection and review;
- informs about individual progress;
- provides information on the performance of the school compared nationally, internationally and with similar schools.

Responsibility for Assessment and Pupils' Achievement

The principal in liaison with the leadership team, is responsible for ensuring that there is an appropriate and coherent system of assessment, marking, recording and reporting in place.

The assessment scheme must meet the requirements of the Education Board/authority which has granted affiliation to the school.

Diagnostic/ Baseline Assessment

Schools are expected to select appropriate diagnostic assessments for pupils who are seen to underperform in comparison with other students and adopt enrichment measures for their improvement.

Formative Assessment

Formative assessment is on-going and although it contributes to a summative assessment it is particularly used to plan the next stages of learning.

Clear objectives for learning are identified in the medium term plans and in lesson plans so that there is a reference point for assessment. However, assessment should also take account of unanticipated as well as planned outcomes.

A wide range of evidence should be used for assessment including observation, listening, asking questions, setting tasks and evaluating the product outcomes of pupils' work. This may include:

- written - rough notes, reports, poems, computer printouts;
- graphic - diagrams, drawings, charts, photographs, videotapes;
- 3D - models, sculptures, constructions;
- oral - spontaneous or planned discussion, presentation, audio tapes;
- physical - co-ordination, manipulative skills, spatial awareness.

Pupils' comments also offer valuable insights on learning and their perceptions have an important part to play in assessment.

Marking and Feedback

Pupils need regular and consistent feedback about their work and progress and to be rewarded when they try hard and experience success. It is important that during the lesson the teacher engages with individuals and groups to give feedback and take the learning forward. Work should not be “set” with the teacher assuming a distanced manager role.

The strengths of individual pupils should be recognised through Records of Achievement, work on display, presentations in assemblies etc. Whenever possible, pupils should be given opportunities to share their successes with a wider audience. Such recognition increases pupils' confidence and motivates them to learn more.

Books must be marked by the start of the next lesson. Marking should be against the objectives for that lesson and should praise the pupil for achievements and indicate how to make improvements. Just writing comments such as “Good” or “Well done!” does not indicate what the child has done well, how the work could be improved and what the next stage of learning is.

Rather than use X for an incorrect answer use a question mark (?). The pupil can then think how to turn a question mark into a tick (✓). When marking the teacher judges whether there are whole class issues for revision or whether groups or individual children need re- teaching before moving on.

Summative Assessment

Summative tests and assessments are implemented at various stages in the curriculum to ascertain what pupils understand, know and can do.

The school should detail the tests and examinations taken by each year group.

Reports

Reports are a crucial part of both record keeping and communication between staff, parents and pupils. They should be neat, grammatically correct and accurate. Parental consultations and the receiving of reports must be planned so

that parents receive maximum information and are able to support their children in the next stage of learning. As a minimum, written reports are issued twice per year.

Where possible the computer system should be used to produce reports but they should not be produced with just fixed comments from computer-generated comment banks. **Parental Consultations**

Parent Consultations should be planned as part of the school year so that parents have as much notice as possible. As a minimum there is an introductory meeting at the beginning of the school year and two further consultations. Parents/guardians should be offered the opportunity to select convenient times with at least 15 minutes allowed for each appointment. Any issues with regard to a pupil e.g. behaviour, failure to make progress, special needs must be addressed immediately. Parents must not be confronted with unexpected issues during a parental consultation.

The purpose of the meeting is to enable parents to view and celebrate their child's work, to discuss their child's targets and progress and ways that they and the school can work together. Parents/guardians may wish to see the teacher without the pupil present. Where parents are separated the school must find out whether arrangements need to be made to give each parent a separate appointment.

The setting for the consultation should be carefully considered enabling parents to have a private and comfortable conversation. Hospitality should be available with support from non-teaching staff.

The teacher must be well prepared for the meeting ensuring that there is an accurate and up-to-date record for each pupil. When the parent enters the room, teachers are expected to smile, stand, shake hands and greet the parent by name. A balanced and well rounded account must be given including personal, social and emotional development. Teachers must be sensitive to parental feelings always starting with the positive and then indicating areas for development and how these may be addressed. The process is two-way so it is important to ask how the pupil is at home and to listen attentively when the parent is speaking. If there are any issues, these should be noted and followed-up.

It is important to keep to appointment times and to offer parents an additional appointment if the discussion is running over the time allocated.

Pupils' Records

The school will maintain a record of details of each pupil which would be contained in the Admission Form along with all records required for granting admissions.

These will include the following:

- personal details: pupils full name, known name (if different), address, gender, date of birth, schools attended, position in the family
- emergency contact address;
- name of family doctor;
- assessment information: school reports, summary information about internal tests and examinations, external examinations; records from previous school if applicable;
- other significant information: for example, psychologists report, social services and health authority reports;
- references for employers, careers service, Institute for Higher or Further Education (IFHE);
- correspondence with parents.

This file may be kept electronically whereby documents are scanned into an electronic file.

Transfer of Information

It is important that data and information are transferred before the end of the academic year so that staff can ensure progression.

Detail the school procedure for transfer internally and transfer to other schools. Detail documentation to be transferred e.g.

- copies of all current assessment records;
- all internal records;
- records of achievement;
- suggestions for setting;
- parental consultation forms from the summer term;
- all test results;

NOTEBOOK CORRECTION POLICY

As a teacher you have certain expectations of your students and the kind of written work that they must present. It is imperative that these are communicated clearly at the beginning of every session to ensure that you get the quality of work that you seek. It is also imperative that you are consistent in your expectation of written work.

While correcting oversights are possible on the part of the teacher. However, acknowledge these and make sure that they are corrected. Accuracy in correction is an indicator of the thoroughness of the teacher and her knowledge of content. It is also an indicator of classroom mechanics.

1. Maintenance of Notebooks

- a. Notebooks and Ledgers will be as per the ones prescribed by the school.
- b. Leave the first three pages for the index. (Class 3 onwards)
- c. All notebooks must be neatly covered with brown paper and have a label affixed bearing the child's Name, Grade, Section and the Subject.
- d. No doodling or scribbling should be permitted anywhere in the notebook. ★★★★★
- e. Students should be taught to take pride in their presentation of work and in the maintenance of their exercise books.
- f. Pages in the notebook must be numbered and no blank pages should be left.
- g. General Instructions to students can be pasted on the inner cover of the notebook as a guideline especially in the Primary and Middle School.

Index

- h. A common index format is to be followed by all.
- i. Students should fill in the index column at the start of the lesson.
- j. Worksheets given must be mentioned.

- k. One index for the whole year, with a horizontal line demarcating the terms.

The teachers are to initial the index page with the date. Index of Work to be done from Gr. 3 onwards

S. No	Date	Topic	Remark	Teachers' Signature
1		Nouns		

2. Subject, Title and Date of Work

- Date of work must be written on the index page and at the top of the page each time a written assignment is done.
- The title/topic/subtitle of the lesson should be clearly indicated at the top of the page and underlined.

3. Correction of Notebooks/ Assessment Papers

- All corrections must be up to date.
- Correction of any work should not exceed more than 3 to 5 days after the assignment is given.
- If a tick is marked on a page or after an assignment it indicates that the matter has been read and found to be correct in all aspects.
- Suggestions for improvement and comments on the work will be written by the Teacher whenever required.
- Ensure that all details are correctly recorded. Eg. date, topic etc.
- Make detailed correction. Major errors to be scored out and the student is to be asked to re-do the work.

- g. Spelling errors to be written correctly. All other errors to be underlined.
- h. Work that is incomplete, must be rechecked after completion.
- i. Follow up on correction work done after each exercise is to be done meticulously.
- j. The title/topic of the lesson should be clearly indicated at the top of the page and underlined.
- k. Emphasis should be laid on neatness of work and maintenance of the notebooks.
- l. All correction work must be carried out by the concerned teacher.
- m. In case a teacher has left school or has been on long leave his/her work will be checked by the teacher taking over.
- n. If a student has missed out on large amounts of written work due to a long absence, phase out the written work over a period of time. In cases where it is possible, (after discussion with the HOS) allow the student to photocopy the material.
- o. Teachers must sign and write the date after the assignment is corrected on the index page and in the margin at the end of the assignment.
- p. Ensure that the answer to the question is a relevant one. Don't leave scope for ambiguity.
- q. Do not over write. If an answer is incorrect and you wish to provide the right answer, please indicate it in the margin or above the word or sentence.
- r. When correcting a notebook or assessment paper make sure that the incorrect word is underlined and a tick or a double line is placed under the error.

- s. Books will be called in for inspection by the Principal / Headmaster / Headmistress/concerned Supervisor / every term.

4. LATE SUBMISSION

- a. Work submitted late, i.e. a few days after the deadline, is to be checked, but a mention must be made.
- b. Students must not be allowed to submit work late on a regular basis.
- c. Late submission on a regular basis may be given a lower grade at the time of the internal assessment.

5. Comments / Remarks

Feedback is an important part of supporting and improving learning. Feedback given by teacher should be specific, clear, meaningful and qualitative. It should help students understand areas of growth and strengths and strategies to improve.

- a. Use positive and appropriate comments as far as possible. Remarks should also be encouraging.
- b. Suggestions for improvement and comments on the work are to be written.
- c. Constructive remarks play a very vital role in developing a child's imagination and creative abilities.
- d. Kindergarten and Primary Teachers are encouraged to give stickers, stars and smiley faces as rewards for motivating students.
- e. Good – Please indicate what is good about the work
- f. Fair/ excellent/ very good/- please qualify
- g. ??- It only serves to increase the student's doubt and is in no way helpful.
- h. Continuously underlined sentences/ paragraphs have no meaning – indicate the type of error- Is it a missing word? Is it incorrect construction? Is it ambiguous? i. Wonderful-qualify

- j. Good boy/girl - praise the quality of the work not the individual.
- k. !!!- Avoid sarcasm. Indicate what is lacking.

6. Worksheets

- a. All worksheets are to be of a uniform size, ie. A4 size.
- b. Worksheets are to be typed out as per the following format.
- c. A one centimetre border should be drawn on the A4 size sheet before preparing the worksheet.
- d. The worksheets should be neat, legible and content based with a variety of exercises.
- e. There should be clear pictures inserted preferably outlined ones so that the children can colour the pictures in.
- f. All worksheets should be numbered and approved by the Principal/Head of Section.
- g. Worksheets and additional materials should be given to all sections of each grade.
- h. Higher ability students to be given complex questions and to be labelled as HLQ (High Level Questions)
- i. All worksheets are to be preserved well. They should be stuck neatly in the notebooks in the Primary School and may be filed and kept safe in the middle/secondary school.

7. Geometrical Work, Map work, Drawings and Diagrams

- a. Diagrams are to be neatly drawn.
- b. Labelling should be clear and legible.
- c. Simple, plain and fully informative diagrams are to be used.
- d. Labelling should be parallel to the horizontal line.
- e. All geometrical work, map work and diagrams should be drawn using a sharp pencil.

8. Follow Up

- a. Proper follow up of the correction work is very essential if home work is to be effective.
- b. Follow up of incomplete work/wrong work should be pursued within a week's time.
- c. Appropriate feedback must be provided and attention drawn to the errors.

9. Correction Symbols (Gr.6 onwards)

A uniform code for correction for written expression is being drafted to help ensure that children understand the errors that they make and are able to correct their mistakes. Where the asterisk appears, those symbols may be used by all subject teachers as well.

Symbol	Meaning
Sp	Spelling Error
T	Tense/ Verb
^	Word Missing
P	Punctuation
U	A new sentence is unnecessary, join up your ideas
//	Indent paragraph
WF	Word form

Teachers are the first point of contact for parents who wish to know how well their children are doing.

School staff are responsible for ensuring the policy and procedures are followed in school.

ACADEMIC EVENTS AND TIMELINES

Event	Scope of the event	Duration	Time
Open house	Acquainting parents to school vision, Mission and Approach	One	Before the session begins
Parent teacher meetings	Feedback on Students Handing over the report card	Total 2	One in each term May before summer break Dec: Before winter break
Student led conference	Student presentations before parents about their learning journey	One	One in first term
Parent orientations	Grade level meets for onboarding parents to the new academic session	One	Once a year
Annual Day	Extracurricular presentation by students	One	Once a year
Sports day		One	Once a year

	Sports performance		
Coffee Meets	Meeting HOS responses	Once is a week	weekly

Induction (Pre-service)	HR Policies COSSH	

LANGUAGE POLICY

A clear, defined English Language Policy, supported by all staff, students and their parents/guardians, will improve communication among all members of the school community, facilitate a stronger learning environment, and will contribute to raising academic standards at the school. Keeping in mind the K12 Core Values of forward- thinking education and world citizenship, strong levels of English at the school, both on the part of educators and on the part of students, are essential for the school's success.

The school aims to be an international school that prepares its students for: a) post- secondary education at reputable institutions of higher learning; b) careers that require fluency in English; and c) positions of responsibility in their own country or abroad. Therefore, since strong language skills are the key to

success in virtually every field, the School's Language Policy will define the role of languages at the school, with the goal of strengthening our students' language skills at every level.

It is essential that high standards for English language use are maintained, in order to ensure that academic standards, remain high and the school fulfils the K12 mission of internationalism.

The importance of acquiring English language skills

English is the de facto language for business, the sciences, academia, and international communication. Thus, in order to prepare our students for higher education and future careers, and reflecting our mission as an international school, English is the primary language of instruction and communication at the school. In this day and age, mere classroom instruction in English is not sufficient. Our students need to be immersed in an English-speaking environment, as much as possible, through the use of English both in and out of the classroom.

The importance of acquiring mother tongue language skills

It is a fact that students who have strong language skills in the native, or first, language, will be successful in learning second or third languages. Since all students at the school speak English as a second language, it is important that the Hindi and English teachers collaborate and support each other to ensure that pupils develop their skills in both languages.

The importance of acquiring skills in other languages

As the school grows, and the student body and staff become more diverse, we must recognize the importance of other languages (not Hindi or English). In the future, it is possible that the school will need to make provisions to provide its students with opportunities to study other languages in-depth.

The importance of acquiring skills in foreign languages

School will follow the three-language formula as per NEP from middle school onwards. The choice of language is at the discretion of the school.

The importance of bilingual

It is important that children in the lower grades are allowed to express themselves in their vernacular language to build comfort and confidence. However, teachers would repeat the instruction in English to build the proficiency but at no point of time will the student be snubbed for speaking in vernacular language.

English will be the form of communication:

1. In all classrooms except in Hindi or other language classes where appropriate, or when by necessity translation is required, at the teacher's discretion
2. For all activities, sports (except on the playing field), residential common areas, library and computer lab, on buses, on official school outings, and on the playground during directed activities
3. When students interact with all teachers and staff during school hours and while conducting official school business (except in the case of an emergency, if lack of English limits an immediate intervention or help)
4. All staff will be expected to use English during school hours when interacting with students, except in non-English language classes, and as necessary in afterschool hours
5. The whole School community will agree to these standards and everyone will strive to ensure that they are maintained throughout the year
6. Parents, guardians and students will be informed of the Language Policy during the admissions process; students will be reminded again at the beginning of school term
7. All students will be held accountable to adhering to the Language Policy. Students will not be rewarded for speaking English except in cases of exceptional accomplishment or remarkable growth.
8. All staff without experience teaching in teaching students with low or no English language skills will be given adequate support and training in order to help them better carry out the Language Policy

9. Other languages will be the primary form of communication only in non-English language classes (e.g. Hindi)
10. Students and staff will be encouraged to study and build their English language skills through reading and other exposure to English language
11. Parents/guardians will be provided with: information on the language learning process; the school's expectations in terms of English language development for each student; the need for strong English language skills in order to be successful academically according to the K12 curriculum requirements; and information on how they can support their students

The Language Policy will serve the needs of our students by:

1. Setting a high standard for language teaching and emphasizing the importance of language skills across all subjects.
2. Emphasizing that all teachers and staff need to encourage and support the use of English, not only the English teacher.
3. Providing opportunities that will challenge students' language skills, such as spelling bees, writing competitions, drama activities, musical events (singing), and through honor or merit awards for excellence in English.
4. Encouraging and guiding students towards participation in language-based activities, i.e. reading, word games/puzzles, listening to music in English, watching films/cartoons in English
5. Creating a "buddy" system for students with English language skills below grade level, by pairing them with a student in their class with more developed language skills
6. Asking parents and guardians to accept and support the Language Policy and by asking them to contribute actively to their students' English language learning.
7. Assessing students' English language skills upon admission and providing appropriate support. Academic

achievement and goal-setting will be encouraged by carrying out regular language assessment tests. Students who make exceptional progress will be recognized.

8. Providing regular, easy-to-understand language assessment reports to parents.
9. Holding regular meetings to discuss language issues and working collaboratively to ensure that all students' language needs are being met.

APPENDICES

For participation in Visits and excursions

I would like (name) to take part in the specified visit and having read the information provided agree to him/her taking part in the activities described.

I consent to any emergency medical treatment required by my child during the course of the visit.

I confirm that my child is in good health and I consider him/her fit to participate.

Signed..... Date.....

Full name of
parent/guardian.....

Telephone numbers:

HOW TO PLAN A FIELD TRIP FOR A KINDERGARTEN CLASS and other grades in general:

Step	Plan
1	Choose the field trip destination carefully. Don't take your kindergarten class to a place where they'll be required to keep their hands behind their backs for fear they might damage something or be bitten. Select child- friendly places where kids will be free to explore items, talk, and interact with one

	another. Avoid taking them to places where there is water/near ponds/pools/lakes etc.
2	All sites for field trips should be visited by a staff member prior to scheduling the trip for children.
3	Call the destination site ahead of time. Don't march into a place with an army of four and five year olds. Be courteous and let the site management know when you plan to visit, and how many children and staff members will accompany you. This will allow them to make any necessary adjustments to the facility, and plan their staff accordingly.
4	Kindergarten field trips must be during school hours. The children must be back in school at least half an hour before they are to leave for the day.
5	Send a detailed information sheet about the kindergarten field trip to parents. The information sheet should contain the time, date, destination, anticipated return, cost if any, number of adults attending, and how children will be transported.
6	Have parent's sign and date permission slips. Never take the children in your kindergarten class anywhere without a signed and dated permission slip from their legal guardians.
7	The teacher should decide how children will be grouped with adults. The adult help must have lists of the children in their care with the telephone number of the school. Be aware at all times where your students are located.
8	Find responsible parents to accompany, and assign them to small groups of children. When you venture outside of the school with a bunch of busy kindergartners, the more supervision you have, the better. It's ideal to have one adult for every four to five children. Each staff member must have a cell phone with them in case of an emergency.

9	Make provisions for children with special needs. If you have special needs children in your kindergarten classroom, you want to take their needs into consideration, and make any necessary provisions for them to attend the field trip, and have a good time.
10	Prepare an emergency kit. Your kit should contain a list of emergency contacts, allergy information, tissue boxes, drinking water and a First Aid kit.
11	Students who are on a school sponsored field trip are representatives of the school and should therefore be in their school uniform with P.E. shoes. Always make the children wear an identity badge or a motif with the child's name, class and section, phone number and name of school with phone number mentioned on it.
12	Schedule bathroom breaks for the children. Young children should never be allowed to use public restrooms without adult supervision. If the field trip site has restrooms with multiple stalls, children can go in small groups with a nanny/teacher.
13	Always do a head count whenever you move the children from one site to another, as they can wander off and disappear without warning.
14	The teacher must have children and parents' names, telephone numbers and school/emergency telephone numbers with them at all times. An accurate list of children in attendance on the day of the trip must be supplied. A copy should be also left at the school.
15	Send a thank you letter on the school letter head to the team that went out to make your trip a success.

16	Follow up activities are, of course, an important part of any field trip. Plan a worksheet related to the place they visited for the children to do when they come back from the trip.
17	Student shall remain seated while the bus is moving. Student shall not put their head, arms or objects out of the bus window. They should not throw objects or eat and drink on the bus. Students should keep the bus clean.
18	Parents, teachers, and students need to plan field trip food so that the food will be safe to eat after being in a lunch box/bag for four or more hours. Foods need to be either nonperishable or they need to be kept properly cold or hot. Keep the following in mind when planning a field trip that includes a meal or snack.
